

Monika Mehan

We firmly believe that small acts when multiplied by millions can transform lives. With the faith that it is the action which is important, we try to bring a positive change in the society by organising free health check up camps, rallies to spread awareness on issues concerning mankind, donation drives for the less fortunate ones of the society. We give our best in the best way possible. We passionately and relentlessly participate in the endeavours benefitting community and wish to bring about a change in the community and the world at large. Our video gives a glimpse of why we Interactors are People of Action.

**The Interact Club of our school has participated in International Interact Video Contest. Following is the link of our video:**
